

# Tactile Frogspawn

Tapioca Frogspawn (made from Cassava flour) is safe to eat, although not very tasty.  
Making this a great, tactile experience for all ages and abilities.

Ingredients:  
Tapioca pearls  
Green food  
colouring

You'll need:  
Saucepan  
Boiled water  
Spoon

1. Pour 1 cup of tapioca pearls into saucepan.
2. Cover tapioca pearls with boiled water.
3. Add 2 drops of food colouring and stir in.
4. Simmer on a medium heat until tapioca pearls begin to go translucent. Stir frequently to prevent sticking.
5. Turn off the heat before pearls are completely translucent. This will leave them with a white middle, adding to the 'egg-like' appearance.
6. Drain off the excess water and allow to cool fully before play.
